Lucente...

Our Lucente door is made from 22mm MDF, vacuum sealed on exposed edges, primed and then given 2 coats of polyurethane paint. We've even got a colour co-ordinated reverse, but while kitchen doors might look the same, the reality is quite different.

COMMON PROBLEMS WITH TYPICAL J PULL DOORS:

Peace of mind with Jigsaw

Vivo...

Vivo is manufactured from 18mm MDF and finished in the same process as Lucente. Ensure you know exactly what you're buying and how long you want it to last for.

COMMON PROBLEMS WITH TYPICAL SLAB DOORS:

Vinyl doors are glued and have the propensity to peel when exposed to the regular steam of a kettle or heat of an oven.

Chipboard can be used as a door substrate but can blow and raise when exposed to water. Not a good combination for a kitchen.

Vinyl doors start to bubble before peeling creating an unsightly look that can't be repaired.

Look out for peeling edges that can flap and irritate you. It's common in kitchens and home and office furniture.
